

TrustWell™ by Project Canary

TrustWell by Project Canary is the most comprehensive and trusted certification program across the energy value chain.

ESG performance matters more than ever before. The trusted, independent TrustWell analysis certifies best-in-class operations, enhances ESG profiles, and enables access to differentiated responsibly sourced gas markets.

TrustWell applies unique local risk factors to every certification, reviews the most operations categories, and potential events to create the industry's most thorough certification standard.

Raise the ESG bar. Engage TrustWell.

-  Evaluate, monitor, and mitigate operational risks with real-time, dynamic metrics
-  Assess engineering controls that prevent industry-specific events
-  Demonstrate ESG integrity, values, action with industry's most comprehensive certification
-  Access differentiated natural gas markets

The Most Trusted and Independent Certification

TrustWell is the operational performance certification standard. A TrustWell rating demonstrates the most comprehensive certification and ongoing monitoring process available.

600+ Data Points

TrustWell certifications evaluate the highest number of data points within 24 operational categories, including 12 dynamic scores for continuous performance improvement.

Engineering Rigor

TrustWell is grounded in oil and gas engineering standards and built with end-to-end industry expertise. Go from basic practices to the best.
